

Inch Cape HSE Charter

This Charter sets out the core Health, Safety and Environmental Values that are a key part of the project behaviour and Golden Rules which everyone within the Inch Cape project will follow.

Inch Cape Golden Rules

- **Safety is our primary responsibility.**
- We work towards a common goal of zero accidents and incidents and take ownership of safety.
- **We work in a no blame culture.**
- We encourage everyone to speak openly about concerns, problems, and mistakes. When others raise their concerns, we listen in order to rectify and learn from them.
- **It is our duty to intervene and stop works if we feel unsafe.**
- By stopping and reassessing we can assure safe completion of operations.
- **We report all unsafe acts and conditions.**
- Learning from unsafe acts and conditions we help to prevent reoccurrence and continually improve safety.
- **We plan our work diligently and execute according to our plans.**
- We assess risks, mitigate them, write and follow method statements and perform a toolbox talk before work starts.
- **We do not allow any work under suspended loads.**
- During planning and operations, we always consider where our work teams will be safely positioned during the lift.

John Hill, Project Director

Environment & Sustainability

We are committed to:

- Playing our part as a responsible business by achieving the highest possible standard of environmental management and by embedding sustainability in all our activities.
- Monitoring environmental and sustainability performance throughout all project phases to ensure continual improvement.
- Effectively communicating with our supply chain and stakeholders, and to engage with the community to enable inclusive input in achieving the highest possible environmental standards.
- Considering the life cycle of materials from design to decommissioning.
- Promoting the 17 UN Sustainable Development Goals in all our activities.
